Wayne or anyone that can help,I have installed pialign to test some box designs and I cannot figure out how to use the program. I runs in a cmd window but cursor movement is not correct for me using the arrow keys etc. Also how do I use New Load Save. I can quit using the escape key. may be I have been using Windose too long and am now totally DOS brain dead.also, how can I find pictures of all Pi Speaker designs with dimensions?thanks in advance,Eric
