Hi all,I got my set of Pi 3 Thermionics a few months ago. Rather than try to DIY them, I opted to have them made for me. I choose Teak for the cabinets - Bill Martinelli did the work - and they came out beautiful. But as nice as they look, they sound even better. I'm hearing things I've never before. Very cool! :)A big thanks to Wayne for the design and Bill for the construction.Best Regards,Gary
