I have seen the midrange horn design here.Could I use this for PA use I guess the design is short throw. I would like to use a 12inch speaker with this design.It is 200rms. 100db for 1watt. 45 to 5000khz with a very flat curveover this freq.I would hope to get out of it 200 to 1.5 khz is this possible???many thanks to any one that can help.Philip Banyer
