Subject: adding a JBL 2360 horn to my 4 Pi's

I have a pair of JBL 2360 horns with PSD3003 drivers. These horns are huge - like 3' long(2 pieces) with an exit size of 2.5'x2.2'. I'm thinking of just mounting them on top of my 4 Pi's and reworking the crossover to be 3 way. I like the midrange throatiness of the PSD3003 and this horn - so 3 way xover at 800 hz and 12 khz is what I was thinking or maybe I should just go 2 way and use the standard Pi crossover.any suggestions welcome.take carecraig
