Hi Gary, I love 'em. For bang-for-the-watt you should hear them with the new little battery-powered t-amp.I'll bring them out again if the guys aren't tired of them. They've been on the road a few times since the last meet to pick up more dings and scratches, etc, and by now they practically jump into the truck when I back up to the deck. At least I wish they would.Might you bring the mighty Theater 4s or the new 3s? What bass driver did you use in the 3s? In the last post I meant Kappa, not Gamma.John
