Thanks for the compliment John. No, I didn't do all that in one afternoon. Just the bare MDF box with braces, foam and baffle cutout. It makes it a lot easier when all the panels are pre-cut to size for you at HD. The veneering, bevel, flush-mount recess, moulding, staining, sanding, and more sanding has taken over 4 additional weekends. For the woofer, I'm using the Delta12LF as per Wayne's Theatre Three design. Excellent low end as would be expected, but was also surprised by the midrange. But I still miss the midrange from the 8PI though. Gar.
