Youl be looking at ~700litres ea then.1x12" lab12 per horn ?If you decide on a driver its easy if you fold the way i do.The classic S style folding still works.That F3 40hz horn,has excursion minimum at 50hz(good for most music) and is 340litres :-)Copy and Pastehttp://www.geocities.com/basshornguy/40hzi.PNGhttp://www.geocities.com/basshornguy/40hzl.PNGCheers!
