You'll be looking at ~700litres ea then. 1x12" lab12 per horn ? If you decide on a driver it's easy if you fold the way I do. The classic S style folding still works. That F3 40hz horn, has excursion minimum at 50hz (good for most music) and is 340litres :) Copy and Paste <http://www.geocities.com/basshornguy/40hzi.PNG> <http://www.geocities.com/basshornguy/40hzi.PNG> Cheers!
