---

Hello,I'm contemplating on owning a Pi speaker (Pi 4) for 3 months now but the only thing that is keeping me is the cabinet construction. I live in a small apartment right now (new house on the way, 2 months)and have no access to tools. I think my woodworking skill is not that great to be able to complete an enclosure for the Pi that I can display in my living room in the future.

Anybody know anyone who builds this cabinet and can be shipped "knock-down" to me? Thanks very much. Hoping to be a Pi owner.
