Hello,Just want opinions from corner horn owners about room positioning. I know that the cornerhorns are supposed to be in the corners of the room but my question is, is it okay or do the imaging suffers when using corner horns and all your other gears are positioned in between the speakers? Say 2 pairs of speakers,TT/CDP/tuner/preamps rack on the middle. Just wondering,how difficult is it to build the cornerhorn plans DIY? Sooting for the Premium 7s. Thank you.
