Subject: Re: What's The Difference Between A Horn And... Posted by Fresno on Sat, 30 Oct 2004 14:00:36 GMT View Forum Message <> Reply to Message

But what is the structural difference? Based on looking at pictures, it looks like horns have a hard surface (wood or plastic) that vibrates the sound out rather than a paper cone. If that is correct, is the "thing" that vibrates the wood or paper the same thing? Fresno
