Subject: Cap Rating for XO? Posted by GarMan on Wed, 24 Nov 2004 00:47:25 GMT View Forum Message <> Reply to Message

Hi Wayne. When building a passive XO from scratch, what's an appropriate voltage rating for caps? By my calculation, a 200W amp only puts out 40V into 80hms. This would mean that Solen's lowest rated caps at 250V should be fine, right? No need to use their PPE series of 650V?Gar.
