Subject: 4pi theatre or 4pi stage Posted by Black on Fri, 03 Dec 2004 20:19:37 GMT View Forum Message <> Reply to Message

I've been looking at both designs. I have a very small room 10 by 11 and am using a 2a3 amp. In previous posts you've said the theatre works much better than the stage with low powered amps. I don't really think I have room for the theatres. Would the stage work well with the 2a3 or should I look elsewhere.
