Thanks and I am going with the corner 7 PI w mid horn, but I like the 8 PI and now I can see a JBL upgrade path.  Plus, I wouldn't mind owning a pair of JBL 18 inch drivers, as I could use them in the A7, or one of the larger PI units.  I just can't seem to get around to having the cabs built, let alone doing it myself. I guess I need to at least buy the mid horns and get that part put together. The 4pi stage and 7 pi stage would sell like hotcakes in flat pack format, if the shipping was reasonable. It couldn't be more than the finished speakers would cost to ship. If it was precut, I think I could force myself to assemble them surely!Russellc
