Aloha,Thanks Wayne for your generosity.I'm putting together a sound system for a new dance space. I think I have the subs worked out and just found your site when checking into mains designs. I wonder if you can look at my situation and recommend a Pi for me.24' x 24' (ceiling 15' in center) 6912 cu ftideal mounting in 4 corners at about 7' (ideally speaker box(es) would be horizontally mounted, 24" or less in height)Use: Music- soft to LOUDSubs- Infinite Baffle w/8 Stryke/Lambda IB15sI'm intrigued by the Pi7 Pro Kit. I'm ignorant of the internal details of the box but wonder if (for my aesthetic ideal) the speakers be mounted horizontally with the horns on top?Thanks,Steph
