Almost Spring. So close to building the 3-way. 4Pi Pro bottom with 2226's. Pi mid-Horn middle with 2123. Giving serious thought to this ribbon tweeter. 99 dB efficient (maybe true?) and wide horizontal dispersion. Kinda horn-like don't ya think? Maybe cross 2226@500-2123@3500?
Aurum Cantus G3Si
