because there hasn't been any.  Not that I've dropped it, nor that progress is even stalled.  But I've just been so busy with other things that I find myself divvying up smaller and smaller pieces of time to each project.The cooling duct fittings were made long ago, and the ball has been in my court.  As soon as I am able, I intend to take those fitting and make some measurements.  Then we'll be able to use that information to know what size the orifices in the one way valve needs to

horn loudspeakers" and "Loudspeaker Venting and Cooling Techniques."In the time that has

distortion.  I also plan to make versions with and without the cooling system.  That will keep it simple for those that don't need the extra power.  But first things first, I'm hoping to have a prototype built from my collection of parts by this summer.
