I want to build a unity horn or something that will offer the same Sound Quality and SPL ablities (SQ needs to be as close as possible to the unity)This is a suggestion from thylantar who's been helping me:"Why not build some Pi Speaker horns? Wayne will giveyou the plans. He offers different designs, horn and not.http://audioroundtable.com/PiSpeakers/Just ask. I don't remember which product line is the big horn."So I posted here... can you guys tell me a little about your Pi speaker horns???? and what's the difference between that and a unity horn
