---

I want to build a unity horn or something that will offer the same Sound Quality and SPL abilities (SQ needs to be as close as possible to the unity) This is a suggestion from thylantar who's been helping me: "Why not build some Pi Speaker horns? Wayne will give you the plans. He offers different designs, horn and not. <http://audioroundtable.com/PiSpeakers/> Just ask. I don't remember which product line is the big horn." So I posted here... can you guys tell me a little about your Pi speaker horns???? and what's the difference between that and a unity horn
