I intended to start breaking in the Vifa 25's tonight. Ran to RS at lunch to get .110 connectors. Bought 4 assortment packages 2 get 8 of'm. $10 bucks. Got to work and discovered 8 of'm in with the caps and resisitors that came with the upgrade kit. Amazing.BTW, running them parallel to the Altec 902's puts the drummer in your lap but female voice very promising.Can't wait to install them in the Towers.
