Eric, Have you looked at the chip amps. They are getting quite rave reviews (see below for one) They list for \$39 but can be picked up for \$20-25. You could bi-amp your system for around \$100. There are also tons of mods on the net that really do make this a "giant killer." I had the pleasure of listening to Ron's Norh last Friday. For \$400 this is a nice tube. I have a Cayin TA-30 that was a steal at \$550, but I don't think it's available anymore.....Colin
