I have come into a pair of JBL 2225 15s and a pair of Renkus-Heinz 1" drivers. I do some PA work, so I'm thinking a pair of cabs based around these should be very nice indeed. Wayne, any suggestions?I was thinking about 4pi bass reflex cabs, with a box for the horns that would latch or be strapped on top.Could you send me the 4pi professional plans please?ThanksLarry Acklin
