Wayne,I'm replacing the studio Pi Two's- my son's taking them to college. Am figuring these will not give quite as much bass as the 2 Pi's- is that correct? If I got these, I'd build a sub later and have killer sound, or go with one of the Four Pi models instead of all that? Hope you're having a Happy Fourth- gotta go grill Red, White & Blue burgers (roquefort cheese inside the meat!).Cheers,Matts
