Subject: Active xover's Posted by GrantMarshall on Thu, 28 Jul 2005 10:13:55 GMT View Forum Message <> Reply to Message

With active xover's you have to pay attention to ohm's of the driver. With actives you don't. I'm assuming they automatically correct somehow or are they set for 8 ohm and aren't true for other impedences? Thanks in advance. Grant.
