>I think the sealed box method is better >for large woofers, and added mass is better >for midwoofers and other speakers with >stiff suspensions.Yea......Maybe too stiff of suspension iswhat throws the W.T.I tried the closed box method on it andmanaged to get a -Vas (I knew they were mind expanding):)The drivers I'm playing with (the kindused in grocery store ceilings) are allhi-Q. Anyways I came up with the below and itmatches the W.T. pretty well.Used Futtrups app as a go-between.Thank You again mike Quick and Dirty
