One 2226 per side gives me great quality bass. You should hear string bass on the 45 amps! What I'm after is 8 ohms with 2 "J's" per side (which I already have) for higher efficiency to go with the approx 105dB of the JBL 2123 on mid-horn and Altec 902's. Then the DRD 45's can really do their thing.
