Hey Bill, That was the first pair auctioned, second pair went for $406 each!I have a pair of fancy two tone cherry 2 Pi towers in storage also. They were a lot of fun.....I wish they weren't such a pretty cabinet now, they'd be fun out in the workshop!With the inflated pricing on JBL 18's I'm considering a departure from the pro sound low end. I may sell off the 4 2226's and do a sealed quad of Peerless XXLS 12's per side powered by a big Crown. In room response strong into the low teens. I've never heard anything like that! Just thinkin' out loud....Jerrod
