Hi Wayne,thats mean for a SET amp like my 300B AN kit One there is a better sinergy with Eminence drivers? (there is other PI spekers models too). Do you belive that for this amp, in my descibed room, Eminence drivers will be the best option? I know this is subjetive, but there are some paremeters like soundstage, low level details,transparence, etc. I hear all kind of music, but 60% of the time is acoustic jazz, 20% Clasics, the rest is Rock, etc (including experimental electronic music)Sorry about this ton of questions, but this will be a blind purchase untill I have build the speakers, so I need all the feedback from whom has experienced both configurations.Regards,Alberto
