O.K., thanks again. So in this way we have the following systems that shared components on 4 and 7 model: Stage: Omega 15 Premium: Kilomax 15 Pro Series: JBL 2226 so the next question will be obvious: which one will be the best match to the AN Kit one? Which driver have the best detail, bass extension, soundstage, etc with a 300B SET amp? Can I suppose that the expensive driver the better sound in this enclosure? (and room size). Thank you again in advance. Sorry about this lot of questions but I have never hear an Eminence driver before. Regards, Alberto
