Hi,so, depends on my budget, the final solution will be the four pro model, first, or the four stage. Then, when I can get the corner situation, upgrading to the seven pi model. On both, with Eminence compression driver. But, as I have read, also the Altec 802 or 902 will be a perfect match (like Bill speakers). Maybe I can get some good pair here. One thought comes to my mind: can I build the four model, but with the mid woofer and the tweeter and on a diferent cabinet the Eminence Magnum 15 or 18, all in bass reflex arrange? Does anyone do this design? Just though. Also, I wonder if there is some more detailed plans (construct details)? Thanks a lot, Beto
