2.0ft<sup>3</sup> to 10.0ft<sup>3</sup> box, port tuned to 30Hz - 35Hz. PiAlign recommends 2.4ft<sup>3</sup> tuned to 33.75Hz. It further suggests cabinet dimensions of 24" x 16" x 10.75", plus whatever wood thickness and offset for internal displacement required. The port it suggests is 2.5" diameter and 2.75" long.
