2.0ft³ to 10.0ft³ box, port tuned to 30Hz - 35Hz. PiAlign recommends 2.4ft³ tuned to 33.75Hz. It further suggests cabinet dimensions of 24" x 16" x 10.75", plus whatever wood thickness and offset for internal displacement required. The port it suggests is 2.5" diameter and 2.75" long.
