I just about fell out of my chair when I saw your post. I just recieved my Stage 4 kits yesterday, and I hope to begin building the cabinets this weekend. I'll keep everyone posted on the progress here on the forum. Good luck with your decision, Wayne helped me decide after a fairly long phone conversation. I have to say he really knows his products, and what works best with certain systems and tastes. I have SET amps from Bottlehead, which is why I purchased the Stage 4 Pi's. Thanks, Justin
