All I can say is holy S%#@! Even with the cheapo connects that came with the CDP this thing sounds good! I have the setup in a 15x15' room with the Pi's in the corners (not ideal, but the wall is split with two doorways to go to seperate bathrooms, so the stereo is in the middle between the doors). The speakers sound a bit peaky and I had to roll the treble setting on the amp off a little bit, but I expect that to smooth out as the Pi's only have about 5 hours on them, if that, and the amp needs breaking in. Not a SET, but definitely nice sounding for an inexpensive SS setup. The Pi's will go LOUD, damn! but sound really, really good at low levels especially with acoustic tracks. Need to go shopping tomorrow for new cables.
