Hi!Iàm need of some advice/opinons regarding Theather 4pi and Pro 4pi!I`am thinking of building one of them but which I don`t know.The current system is Bob Brines LT-2000(Lowther DX2) construction driven by two monoblock Audion 300B push pull,aprox. 24W.Iàm happy with this due to the kind of music I àm into(blues,country,rock).But what I àm looking for now is speakers which handle rock music better(more bass).I would be grateful for oppinions!Michael
