Hi, this is my first post here, I have been looking for a horn design for a pair of JBL E155-4's I have that fits in our room, your pro series Seven Pi-18 corner horns look very interesting, I would plan to use them from 80-100Hz down, with Edgar style 80hz straight horn/EVM15L and 250Hz horn/JBL le5-2 tweeter undecided, what do you guys think?,also can I have copy of the plans to look at, Thanks John
