I like them too. I'm having a pair built with a two-tone wood finish. I'm wanting a look sort of like the old tube radios, not so much in styling but in wood contrasts. Cabinet makers in the 1940's did cool stuff with two-tone woods and pin striping and what not, and that's the look we're going for with mine. Trouble is I have the wood shop going full tilt on other stuff now, so they don't have

2006 this May, and I suppose that's a possibility, but I think it's probably too optimistic. Besides, I don't want to rush them, I can always show them next year at GPAF 2007. The walnut Pro four

they're favorites of mine.
