I'm sure Bowers and Wilkinson can feel my hot breath on their neck with my design:I call it "NAUTILUS Pi"By combining the tweeter baffle with the crossover I can swap resistors and caps with 'gator clips to find the best combination right at the source. Right now I'm digging 16 ohms across and 4.3 uF. That could change tomorrowWhat won't change is the heretofore unheard with horns imaging I'm getting with this mount.
