Subject: Corner horns with no corners?

I've E-mailed with Wayne somewhat about the virtues of corner vs. non-corner loading cabinets and he is of the opinion I would like the corner loading better. Here's the rub-- I don't have two corners I can use in my present house (we're leasing). Can two short panels, say 48" tall for arguments sake, that are 36" wide and hinged at the middle be substituted for corners to good effect?
