Thanks for posting the pics. It's a good lookin' amp! Cool Class AB, just what you need in the summer. Swap back to Class A for the winter. How much power? What are the outputs, discrete, chip, FET? It kind of reminds me of the ProFet amp, which I really like. The ProFet gets hot enough to cook on, probably generates more heat than my Audio Note Kit 2. But that plain look is kind of cool. It doesn't wow the people at shows like a tube amp does, but I like the looks and love the sound.
