driver specs: $R_e = 5.4 \text{ ohms}$ $L_e = 1.27 \text{ mH}$ $C_5 = L_e / R_e^2 = 1.27 / 5.4^2 = 1.27 / 29.16 = 0.4355 \text{ uF}$ Is my math off? This value seems a bit low. Adam
