Being payday, I ordered 2 .33uF Supremes from Madisound, $29 with shipping. Geez, did I really pay that much?They'll replace the Kimbers in the horn attenuation circuit. I am debating whether to spring for the North Creeks on sale as did Matts. The necessary 6-10uF's are about $42 and another $50 or so to by-pass with the Crescendo's.Will wait and see what the little Mundorfs accomplish.
