Wayne, my friend Steve had talked with you last weekend and from what I understand he/we are planning a 4Pi cabinet with the 10" mid added to the equation since we don't have corners to put the speakers in. I wasn't sure just how the mid range was to be added....I think Steve mentioned a flatpack?? So basically a 7Pi but using the 4Pi bass reflex cabinet if that makes sense. Thanks in advance.Russ
