Yes you did and my detailed sketches are made from your plans. Is the 4 5/8" port size for the 3/4" close enough for the 13/16" thick board I'll be using? (Extrapolating would be 4 11/16" but I think I would be splitting hairs..or...?) BTW, if you'd like them for your review and use, I've got the sketches in Autocad.Roland
