Subject: Re: Inductor values for Theater 4 pi crossover (newby question) Posted by Wayne Parham on Fri, 07 Jul 2006 13:29:35 GMT View Forum Message <> Reply to Message

That's right - 1.0mH in series with the woofer and 0.6mH shunt in the tweeter crossover circuit. The other two coils you see in the schematic are the drivers, shown as a coil with a cone; The coil represents the voice coil.
