Thanks, Wayne. The decals are now on the speakers, so I suppose that officially makes them Pi speakers. I had to peel them off the wax paper - looks like they were subjected to UPS' Oklahoma/Texas summer heat treatment.I like Shane's idea for copper badges. Luther (Wardsweb) designed the gold tinted badges that Bottlehead offers. Now that he has designed and built his own CNC machine for cutting speaker panels we need to convince him to build some Pi speakers, and I'm sure he'll design a gold Pi badge.
