Audio Note Kits was there. They were demoing a new EL34 PP amp, which is a departure from their previous low power SET amps. The tops were off all the Audio Note Kits so you could see inside, and the assembly manuals were displayed on the table. The manuals are very well written. They offer lots of options. For example, their DAC kits range from \$750 for the most basic to \$2,400 for their top model with all the upgrades.

Audio Note Kits
