Hello Wayne, I had Bill Martinelli build me your Sevin pro 18 corner horns a few years back. These are the ones he has on his site,You built me the crossovers for them. These speakers are simply tight, sweet & Thunderous! The crossovers you built for these speakers make all the differance in the world. The drivers used in this system are 2445h, 2123h,& 2426h. I have a beautiful pair of 077 slot tweeters, can they be added to this system or is there any downfalls to doing so. If so will you let me know what we can do to the crossovers to make this happen. Or make new crossovers for this new set up.Thank you Ken
