Hi ... What are the negative points for using a bigger driver on a horn that was originally designed for 8" driver? Horn is from JBL SR4735X.
http://www.jblproservice.com/pdf/SR-X%20Series/SR4735X.pdfThroat is 19 sq. in. Normal Sd/St was 2.43. I would like to use a 10" driver, but Sd/St would be 3.5. BTW will use open chambered.
Thanks, Zene
