I've asked this before, but seem to have lost the bookmarks to the info.I am running Wright Sound 2A3 amps. Which of the Pi 4 speakers would you recommend? I don't think I can afford the Pro series.Also, I remember reading about using the 7 Series mid horn and tweeter with the 4 Series bass cabinets. What are the benefits (besides eliminating the need for suitable corners in the room).Does this affect the efficiency of the speakers?Jim D.
